Top 10⁺ Innovations for Higher Education

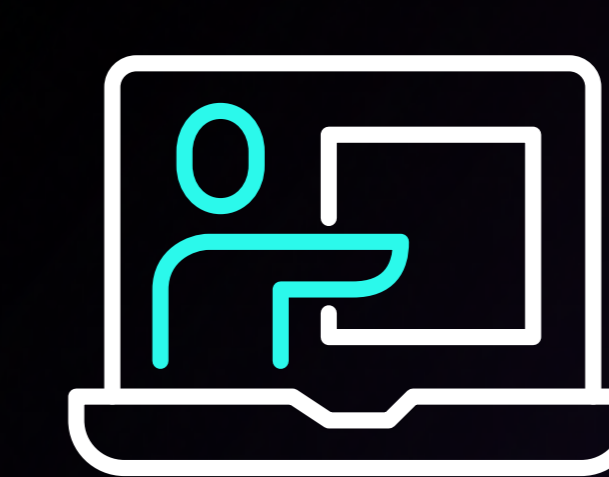

Guarantee reliability

Industry-first performance guarantee, critical for digital learning and research.

Support academic mission

Automates day -1/N lifecycle services, saving time to support institutional priorities.

Enable digital learning

Proactively addresses any deviations in service quality, before disrupting operations.

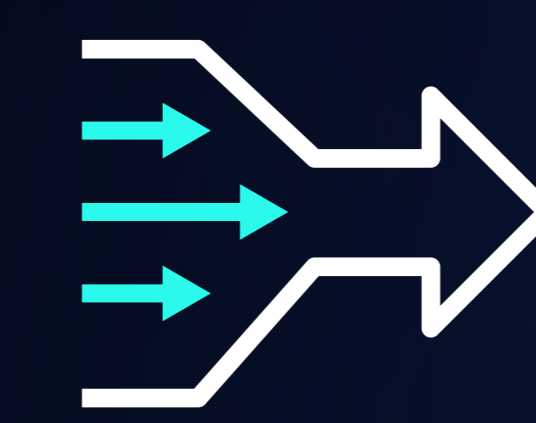

Safeguard the campus

Extends zero trust networking to the network edge, isolating each mobile and IoT device.

Guarantee data privacy and safety

Employs hardened network elements and SOC-2 Type 2 compliant cloud service.

Converge and simplify

Integrates 10+ wireless, wired, security legacy products into one unified solution.

Eliminate capital expense

Offers monthly and annual payment models, without no upfront capital required.

"With Nile, we have been able to reduce our 5-year total cost of ownership (TCO) by 50%."

- University of the Arts

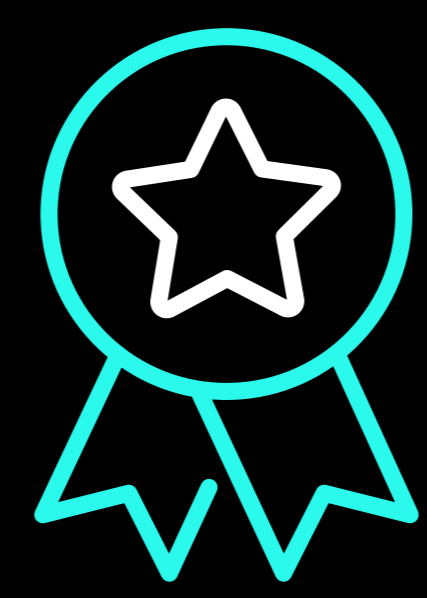

Align with budget priorities

Enables billing per user or per square footage, on a per building basis across the campus.

Self-tune and optimize

Software enhancements and hardware refresh are automatically managed by Nile.

Partner in academic excellence

Nile's service delivery and customer success teams proactively address network issues.

"During our freshman move-in, we received zero network related trouble tickets. This has never happened before Nile."

- Daemen University
